LN is a nonprofit organization that creates innovative solutions for the everyday health challenges facing East Africa's poor. In 2012, LN launched a conversion franchise network in Burundi, East Africa to build to capacity of 10 local faith-based clinics and hospitals through nurse training, management training, growth financing and medicine supply. We have rapidly expanded upon this foundation and have increased our partner network to 90 partner facilities in Burundi, Uganda, and the D.R. Congo, together serving more than a million patients annually. Our goal is to improve clinical performance 50% within 24 months of partnership, but we regularly see performance double in that time. In addition, LN aims to help clinics achieve financial sustainability through our medicine supply and equipment financing. By 2025, we plan to double the quality of care received in 20,000,000 patients visits to 1,000 franchised clinics operating in 10 East African countries.

Burundi, Uganda, and the D.R. Congo have the lowest human development rating given by the UNDP. In Burundi, 10% of children die before the age of 5; in Uganda and the D.R. Congo, child mortality is 6.9% and 11.5%, respectively. Doctors in these countries are largely concentrated in a handful of urban areas where less than 15% of the populations live. The rest of the population depends upon community health centers that often struggle to provide even the most basic care and medicines. LN aims to make significant and sustainable improvements to quality of care in these health centers through our conversion franchise model.
