Q2 2020 REPORT

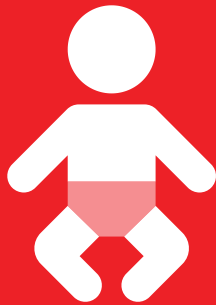

8 YEARS. 10 MILLION PATIENT VISITS.

CELEBRATING 10 MILLION PATIENT VISITS IMPROVED SINCE 2012

LIFENET IS TRANSFORMING AFRICAN HEALTHCARE

Since 2012, LifeNet's asset-based model has transformed healthcare in local, faith-based health facilities through **training, mentoring, and access to equipment & pharmaceuticals.**

SAVING LIVES SINCE 2012

Trained health workers are able to treat and manage postpartum hemorrhages, perform infant CPR, prevent & treat infectious diseases, and provide the high-quality care their patients need to lead healthy & whole lives. Last year alone, **health workers saved 241 babies' lives** using the infant CPR training they learned from LifeNet.

**4 COUNTRIES.
240 HEALTH FACILITIES.
1,479 HEALTH WORKERS.**

In 2012, LifeNet launched its program among 10 facility partners in Burundi. Today, LifeNet is transforming care with 220 health facility partners in Burundi, Uganda, DR Congo, and Malawi, training 1,479 health workers.

“We have continued to apply the knowledge we learnt from LifeNet, and the patient volume began to increase due to the compassionate care we are offering to our patients. As the number of patients was increasing from day to day, the cash flow was also increasing.

With the cash flow we earned from the good work of our nurses, **we were able to transform the health facility** from a mere health center into an exemplary hospital which is handling serious illness cases in Rumonge District.”

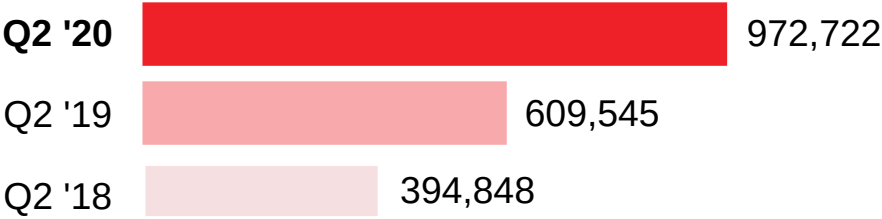

-Dr. Diomed, Medical Director of Birimba-Amahoro Hospital, Burundi

SPECIAL REPORT

COVID-19 Training & Equipping

The COVID-19 pandemic has as accentuated existing health inequalities around the world.

In addition to the threat of the virus itself, which is making its way through African countries, the pandemic is already causing devastating secondary effects in the region, including a decrease in care-seeking leading to thousands of preventable deaths.

We are dedicated to seeing all LifeNet partner facilities equipped to address COVID-19 in their communities. We are also committed to ensuring that our partners are able to continue providing vaccinations, safe birthing places, care for other infectious diseases and other lifesaving primary care services for their communities during this pandemic.

LIFENET NEWS

- **COVID-19 Response:** We continue to provide PPE and hygiene tools, training on COVID-19 and infectious disease prevention, and coaching our partners in this difficult time. Our team is also working to digitally enable all LifeNet trainings to allow for primary care and COVID-19 trainings to continue even in the face of future lockdowns or travel restrictions.
- **Pfizer Foundation Global Health Innovation Grantee:** For the fifth year in a row, the Pfizer Foundation has named LifeNet a Grantee in their Global Health Innovation Grants Program. The program exists to "address the challenges of improving healthcare delivery around the world" and supports a cohort of 10 LifeNet partnerships in Uganda.

LifeNet delivered essential personal protective equipment (PPE) to partners.

FACES OF LIFENET

Gabriel Ngabe-Kandjo is a LifeNet nurse trainer and M&E specialist in Burundi. Gabriel trains nurses in LifeNet partner facilities as well as collects and analyzes data to assess improvement among LifeNet partner facilities. Outside of work, Gabriel enjoys reading and taking online courses. When asked what he is most proud of professionally, Gabriel replied that seeing quality of care improve and nurses improve the care they are providing is his most rewarding achievement, particularly because he is supporting them in improving themselves through their own efforts.

Gabriel's favorite memory from his LifeNet career so far was receiving a call from a partner health facility letting him know that they had saved a baby's life using the infant CPR they learned through LifeNet training.
