

LIFENET INTERNATIONAL
2021 ANNUAL REPORT

**TRANSFORMING
AFRICAN HEALTHCARE.
SAVING LIVES.**

PREVENTABLE

74% of maternal deaths and 80% of infant deaths are
p r e v e n t a b l e

LifeNet International transforms African healthcare facilities to provide quality, sustainable healthcare and **save lives.**

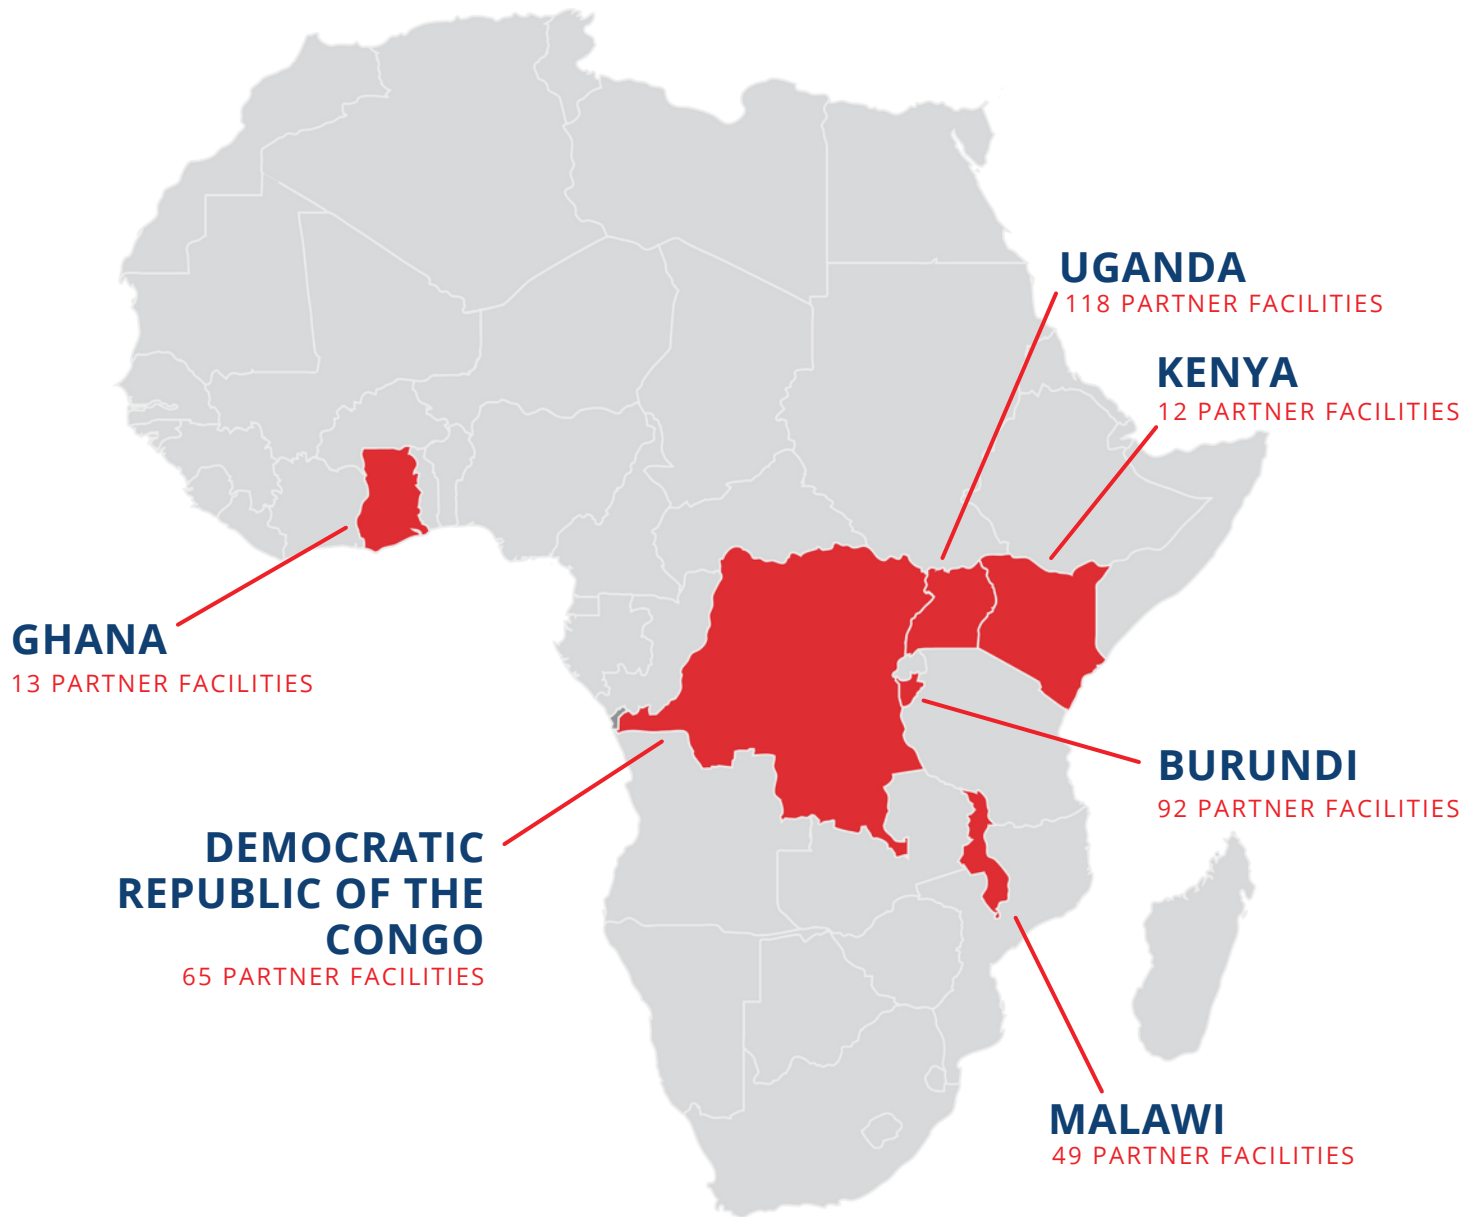

Our Christian faith and commitment to justice, compassion, and caring for the poor motivate our efforts to build resilience in local African health facilities. **We believe that all people, made in the image of God, should have the opportunity to live healthy and whole lives.**

The LifeNet mission fuels our passion to address the **preventable** deaths and diseases plaguing communities in sub-Saharan Africa.

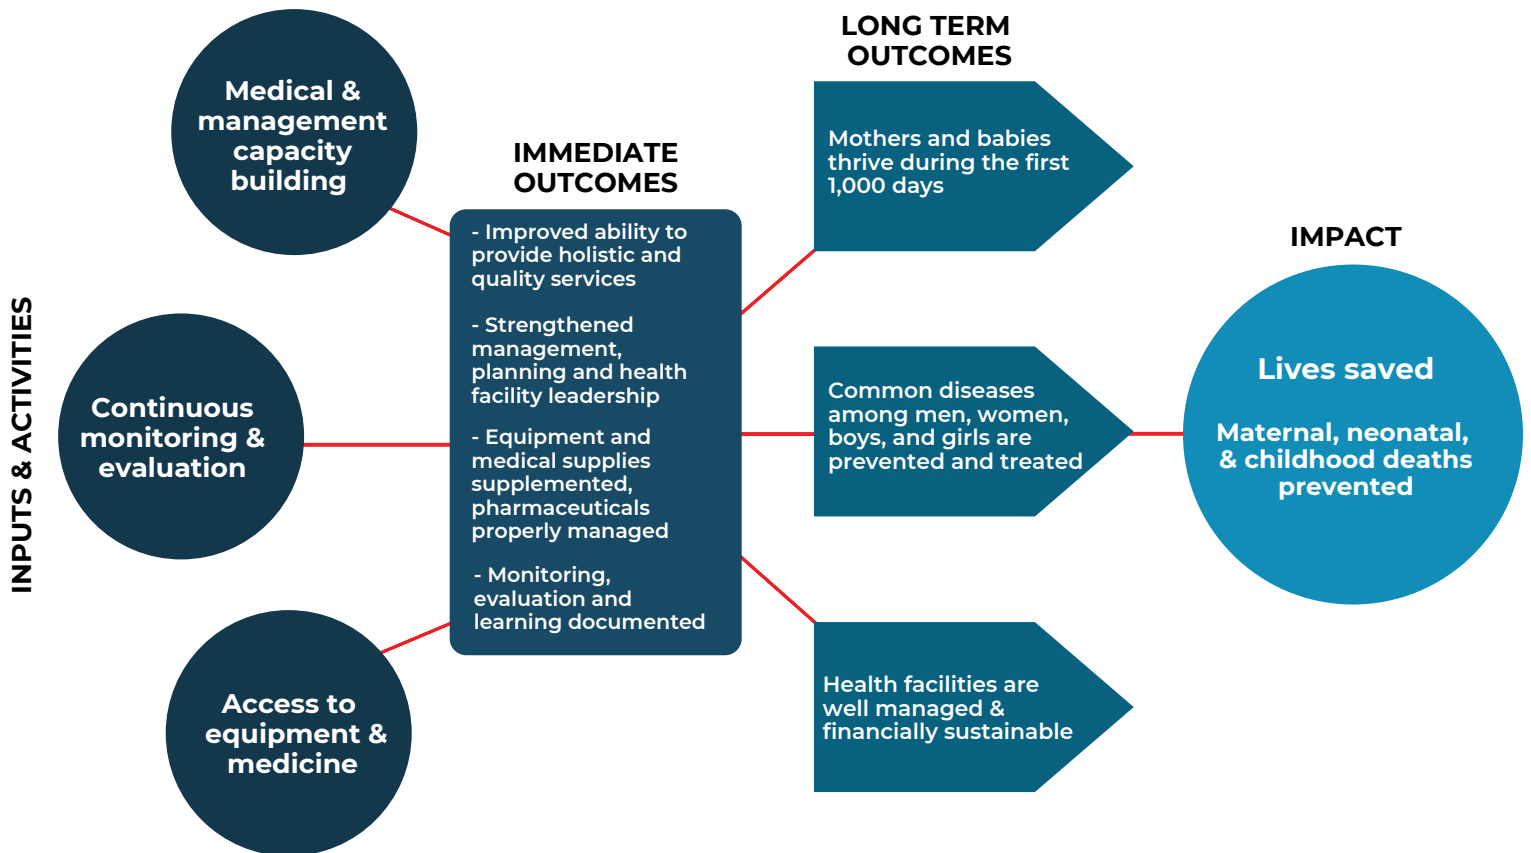

WHERE WE WORK

349 PARTNER HEALTHCARE FACILITIES IN
6 COUNTRIES

THE POWER OF PREVENTION

Our approach is a high-impact combination of evidence-based, cost-effective interventions that change communities and save lives.

“I am very satisfied with the way the caregivers here at the clinic welcome us with compassion and kindness. I had a lot of complications and threats of a miscarriage when I was pregnant. They treated me effectively and followed me throughout the pregnancy and after I gave birth well. **This is how we were saved—me and my child.**”

-Jacqueline Ngendakumana, patient

OUR APPROACH PREVENTS DISEASE & DEATH

MEDICAL TRAINING

Five modules of high-impact clinical care training addressing leading causes of preventable death using a hands-on, behavior change approach.

MANAGEMENT TRAINING

Four modules of management training that build financial resilience, efficient administration, and improved governance to help create more sustainable facilities.

EQUIPMENT SUPPLY

Access to the tools facilities need to save lives.

DIGITAL LEARNING

Accessible online training & support designed for low-resourced settings.

MONITORING, EVALUATION, AND LEARNING (MEL)

Real-time information to improve and grow.

MARGARET'S STORY

"I am grateful for the nurses at this facility. This is my second born daughter and I had my first born at the same facility in 2018 [before LifeNet training] but the experience was different. During the birth of my first born baby I did not receive the good care as compared to now. This time, I felt more comfortable because the nurses were so happy, helped me on time and I had no challenges."

2021 AT A GLANCE

1,612

Newborn Lives Saved
in 2021

1,177

Mothers' Lives Saved in
2021

5,723,400

Healthcare Visits
Improved in 2021

JOYCE'S STORY

"Our facilities used to have a lot of maternal deaths because pregnant women were not seeking antenatal care on time. After LifeNet came, I was trained on how to encourage pregnant mothers to seek medical care during pregnancy. Because of this, we have contributed greatly to the delivery of preventive health services and reduced preventable deaths."

TRAINED HEALTHCARE WORKERS **PREVENT** DISEASE & DEATH

The following percentages represent average facility quality scores prior-to and after LifeNet training and mentoring.

Before Training

After Training

10%

91%

Implementation of clinical protocols for handwashing to reduce the spread of preventable infections.

8%

93%

Ability to perform neonatal CPR and prevent newborn deaths.

12%

95%

Ability to treat a postpartum hemorrhage and prevent maternal deaths.

AND DELIVERY

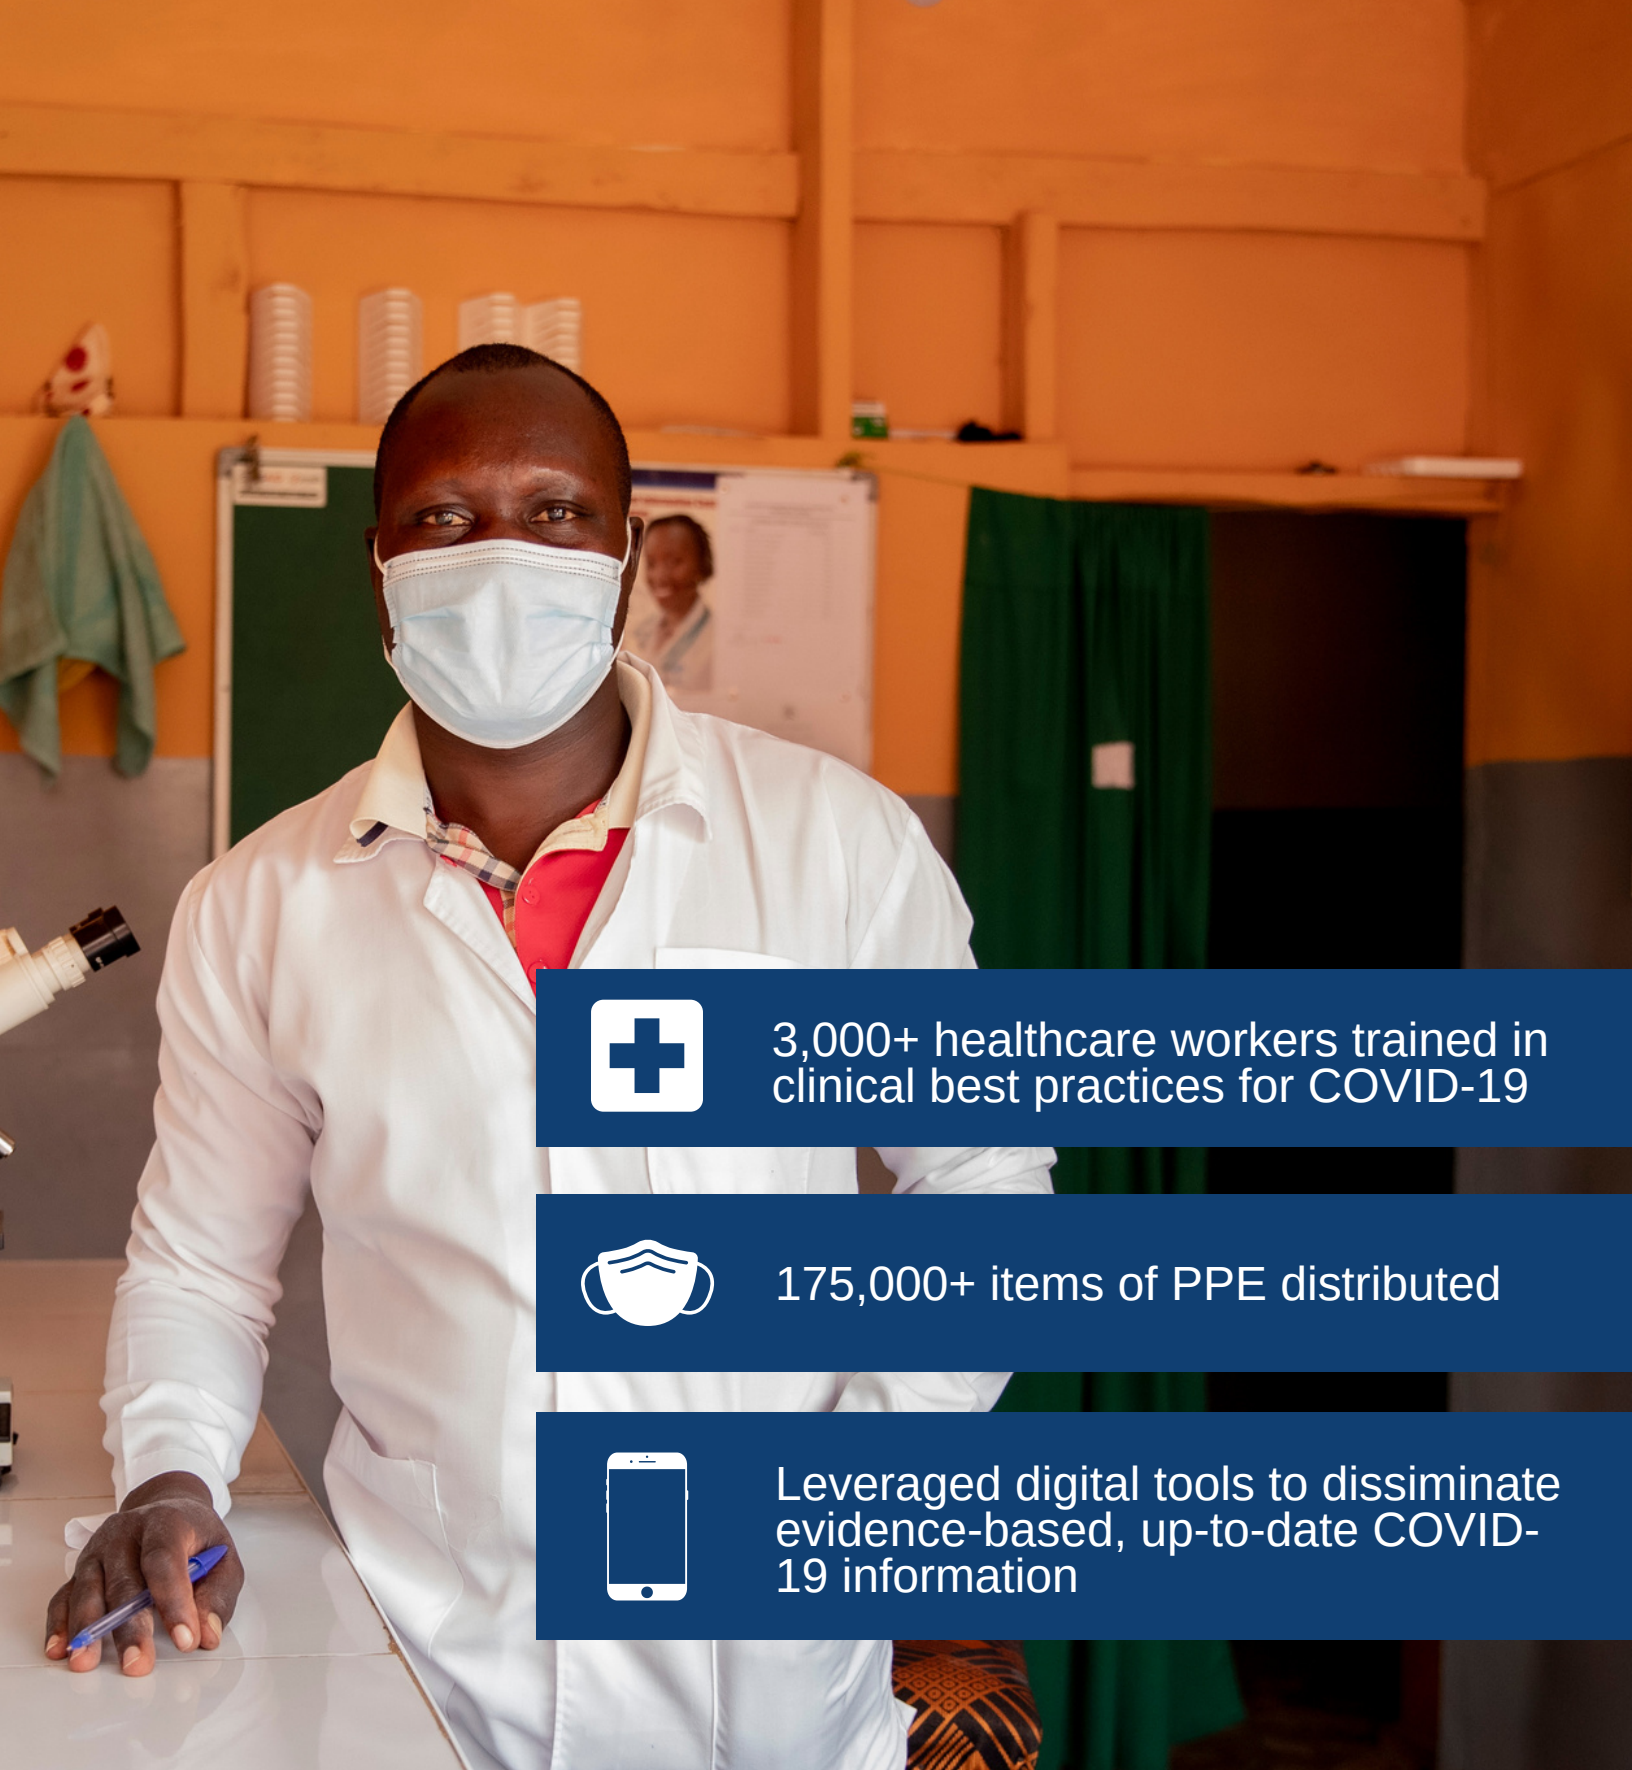

ESTHER'S LIFE SAVED

KELLEN & ESTHER

Kellen Mashanyu is a mother in Uganda who found herself facing every mother's greatest fear: Her baby daughter, Esther, came down with malaria—a disease that takes the lives of hundreds of thousands of children each year. In fact, every 2 minutes, a child under the age of 5 dies of malaria. You can imagine the anxiety and urgency that Kellen felt as she carried Esther (pictured above) to find healthcare. Kellen took Esther to a LifeNet partner facility to get vital malaria treatment, and Esther has recovered well! The deaths of children like Esther from common diseases like malaria **are preventable.**

3,000+ healthcare workers trained in clinical best practices for COVID-19
